

ALFRED PRAH

Solution Engineer | AI/ML Practitioner | Product Builder

alfredprah@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Solution Engineer and AI/ML practitioner with 5+ years designing, deploying, and embedding alongside enterprise customers to ship production AI systems. Currently support 180+ healthcare and life sciences enterprises on Snowflake's AI Data Cloud, with prior consulting delivery across retail, CPG, and Big Tech. Independent operator shipping live consumer AI products outside of full time work. Strengths: customer embedded delivery, full stack ML pipelines (NLP, recommenders, time series, GenAI), and translating ambiguous business problems into measurable production outcomes.

EDUCATION

Master of Science, Data Science*Nashville, TN*
Vanderbilt University

Bachelor of Arts, Communication of Science and Technology*Nashville, TN*
Vanderbilt University

PROFESSIONAL EXPERIENCE

Solution Engineer, Snowflake Inc.*March 2025 – Present*

Healthcare & Life Sciences vertical. Previously: Retail, CPG, and Consumer Goods.

- Serve as embedded technical partner for 180+ enterprise customers (hospitals, pharma, biotech, payers), translating business requirements into AI Data Cloud architectures spanning data engineering, ML, and governance.
- Design and prototype reference architectures for clinical NLP, claims analytics, patient 360, and generative AI assistants using Snowflake Cortex, Snowpark, Streamlit, and external model integrations.
- Lead executive technical briefings, deep dive workshops, and proof of value engagements; convert open ended discovery into shippable customer outcomes.
- Demonstrated cross industry range by transitioning from a retail / CPG book of business to regulated healthcare and life sciences within the same role.

Senior Data Scientist, Launch Consulting Group*August 2021 – March 2025*

Promoted three times: Associate Data Scientist → Data Scientist → Senior Data Scientist. Clients: Microsoft, USANA, Lowe's, Bowlero, Ecolab, AARP.

- Embedded as forward deployed data scientist across Fortune 500 clients; led delivery of production ML systems end to end from scoping through deployment and handoff.
- Improved 4 production recommender systems by 60% in offline evaluation by implementing a hybrid model combining collaborative filtering with content based signals; alleviated cold start by 25% via schema redesign on Amazon Redshift.
- Reduced inference latency 10% on Microsoft's Workplace Analytics platform by refactoring 21 PySpark and Scala notebooks and migrating the codebase from Databricks to Azure Synapse.
- Drove a 62% revenue lift on a B2C win back campaign through a Snowflake and Snowpark pipeline that scored churn risk and personalized reactivation offers.
- Built and taught the firm's Generative AI curriculum for client executives and internal practitioners, covering LLM fundamentals, RAG, evaluation, and responsible deployment.

Data Science Intern, GEODIS*January 2021 – May 2021*

- Shipped 200+ time series forecasting models into production across 37 client warehouses to predict volume and labor demand, generating \$100K+ in documented cost savings.
- Cut RMSE 32% across 300+ deployed models via root cause analysis on 11 faulty pipelines and corrective retraining.
- Authored the internal Python style guide adopted by the Data Science team to standardize code review and reproducibility.

Graduate Researcher, Vanderbilt Data Science Institute & ROCCA Lab*February 2020 – May 2021*

- Built a hybrid deep learning model (RoBERTa + fast.ai) to predict settlement outcomes in U.S. class action lawsuits at 86% accuracy, processing ~3,000 cases and ~18,000 PDFs.

- Designed a PyTorch text classifier predicting civilian sentiment at 81% accuracy on unstructured field reports.
- Shipped interactive analyst tools (Tableau, R Shiny, Streamlit) linking civilian collective action to conflict trajectories.

Data Science Intern, OhanaHealth*May 2020 – August 2020*

- Designed and deployed a hybrid deep learning recommendation engine using transfer learning that achieved a 5% paid subscription conversion rate.
- Lifted targeted ad click through rate 12% by developing data driven user personas and market segments.

INDEPENDENT PRODUCTS

Momenta — Founder & Sole Engineer*2026 – Present*

- Privacy minded wellness application for mothers, live on the U.S. App Store and Google Play Store (hellomomenta.com). Native iOS (Swift) and Android (Kotlin) with Firebase backend and subscription billing. Features mood tracking, guided breathing, voice journaling, 240+ curated quotes, streak analytics, and milestone badges, grounded in emotional granularity, cognitive reframing, and behavioral activation research.
- Achieved a 70% install conversion rate on the Google Play Store, validating product market fit and store listing quality at launch.
- Sole engineer across product, design, native mobile development, backend, analytics, and go to market.

GenAIBro — Founder & Product Lead*January 2024 – Present*

- Full stack generative AI learning platform on Microsoft Azure (genaibro.com), built to take working professionals from zero to deployable LLM applications.
- Built a proficiency evaluation system with 270 curated questions, end to end Python notebooks, and gamified progression.
- Integrated LLMs into the content pipeline for automated paper and news summarization, lifting session depth and content freshness.

Qarby — Co-Founder & CTO*2023 – 2024*

- AI powered real time car recommendation platform on Microsoft Azure (qarby.com). Architected a low latency inference path using model pruning, quantization, Azure Redis caching, and load balancing.

TECHNICAL SKILLS

Languages: Python, SQL, PySpark, Scala, R, Swift, Kotlin, JavaScript, C#, .NET

AI / ML: LLMs and Generative AI, RAG, fine tuning, LoRA, NLP (RoBERTa, BERT), Deep Learning, Recommender Systems, Time Series Forecasting, Causal Inference, Computer Vision, Transfer Learning, MLOps

Data & Cloud: Snowflake, Snowpark, Snowflake Cortex, Streamlit, Databricks, Azure ML, Azure Synapse, Amazon Redshift, Palantir Foundry, PostgreSQL, Cosmos DB, Oracle, Firebase, Azure Redis

Mobile & Product: iOS (Swift), Android (Kotlin), React, full stack web, Tableau, R Shiny

Certifications: SnowPro Core (Snowflake), Azure AI Fundamentals (Microsoft)

SELECTED TECHNICAL WRITING

- [Why Momenta Works: The Psychology Behind Daily Rituals for Mothers](#) (April 2026). The research and product thinking behind a wellness app built specifically for mothers.
- [Optimizing for Speed: The Pursuit of Instantaneous AI Recommendations at Qarby](#) (January 2024). Azure architecture and inference path optimization for real time AI recommendations.
- [Understanding Confounding: A Critical Insight for Data Scientists](#) (November 2023). Why confounding matters in observational studies and how to reason about it.
- [Navigating the Unknown: The Power of Uncertainty Quantification](#) (November 2023). Uncertainty quantification through the lens of Netflix and Spotify product decisions.
- [What Does It Mean for Two Sets of Documents to be Similar?](#) (April 2023). Text similarity methods and their limitations.
- [The Attention Mechanism in Natural Language Processing](#) (April 2023). The mechanism behind RoBERTa, BERT, and ChatGPT.
